

Rang-lista učinaka veterana prema tablicama starosnih koeficijenata

Napomena: U - učinak i T2 - svedeno vreme na nivo 23-35(M) i 21-29(Ž) godina života, izračunavaju se pomoću formula :

$$U = E / (T1 * K)$$

$$T2 = T1 * K$$

gde je E - vrhunski vremenski ekvivalent, koji za muške iznosi 02:04:55 a za žene 02:15:25,

T1 - ostvareno vreme u maratonu

K - koeficijent starosti koji se uzima iz veteranskih tablica WMA (http://www.eliteracingsystems.com/2007_roadraces_results/agegrade.html) na osnovu broja godina (BrGod)

stanje na dan: 13.01.2021.
